

Excel Theranostics

A structured referral pathway for US physicians caring for patients with advanced or metastatic prostate cancer.

We help US prostate cancer patients access **theranostics** pathways. When a patient **does not meet US FDA criteria** for options such as Lu-177 / PSMA theranostics, we provide a **local US consult** and, when appropriate, a structured **referral pathway to Australia** — with logistics support and updates back to you. We do not replace your care. We extend options when US eligibility is a barrier.

Who to refer

Consider referral when:

- Advanced / metastatic prostate cancer under your care.
- Theranostics (e.g., Lu-177 / PSMA) is under discussion.
- Patient **does not meet** current US FDA label, trial, or typical coverage/eligibility criteria — or you want a structured second-path consult.
- Patient is willing to consider international care if clinically appropriate.

Not a fit for this pathway alone:

- Patients who need urgent local emergency care.
- Patients unwilling or unable to travel when travel is required.
- Situations where you want Excel to assume ongoing primary oncology management in the US.

Final clinical decisions remain with the treating physicians (US and Australia). This sheet is not medical advice.

Australia pathway — 5 steps

- 1. Refer** — Send the patient (or records) to Excel; we schedule a local US consult.
- 2. Consult** — Eligibility framing, risks/logistics discussion, shared decision with the patient.
- 3. Intake** — If proceeding, we assemble records and submit to **[partner clinic AU]**.
- 4. Travel & treatment** — Our navigator coordinates logistics; clinical care is delivered by the AU team.
- 5. Return of care** — You receive milestone updates and a post-visit summary for continued US management.

What Excel handles

We handle	You keep
US consult scheduling Records packaging & AU intake coordination Navigator: travel, lodging, caregiver logistics support Milestone updates to your office Close-out packet after return	Primary / longitudinal relationship Clinical judgment on whether to refer Local acute care and ongoing US treatment decisions

We do **not** invent outcome statistics or guarantee treatment response, dates, visas, or payer coverage for care abroad.

How to refer in under 5 minutes

1. Call **800.550.3194** or email **info@exceltheranostics.com**.
2. Or fax / portal: **[fax/portal]**.
3. Send: patient identifiers + brief reason for referral + key records (or we will request them).
4. We confirm receipt within **1 business day** and contact the patient to schedule.

Preferred referral channel: phone or email — 800.550.3194 / info@exceltheranostics.com
